

JOB TITLE:
Senior Data Engineer- Databricks

At Simbus, we bring Richard Branson's saying to life: "Train people well enough so they can leave, treat them well enough so they don't want to."

JOB OVERVIEW:

We are seeking a highly skilled and experienced Senior Data Engineer with a strong background in Databricks to join our dynamic team. The ideal candidate will have over 4 years of experience in data engineering, with a comprehensive understanding of end-to-end development and CI/CD on Databricks. This role will involve designing, developing, and maintaining scalable data pipelines and systems to support data-driven initiatives.

WHAT YOU'LL BRING:

- Bachelor's degree in IT/Computer Science or a related field.
- 4+ years of experience in data engineering, with a strong focus on Databricks.
- Strong understanding of data modeling, ETL processes, and data warehousing concepts with Mastery in SQL.
- Proficiency in programming languages such as Python/Scala.
- Experience with big data technologies such as Apache Spark and Hadoop with hands-on ability to handle large volumes of data in day-to-day tasks.

WHAT YOU'LL DO:

- Design, develop, and maintain scalable data pipelines and systems using Databricks.
- Collaborate with data scientists, analysts, and other stakeholders to understand data requirements and deliver high-quality data solutions.
- Implement and manage CI/CD pipelines for data engineering projects to ensure smooth and efficient deployment processes.
- Optimize and tune data processing workflows for performance and scalability.
- Ensure data quality, integrity, and security across all data engineering processes.
- Develop and maintain documentation for data engineering processes, systems, and workflows.
- Stay up to date with the latest industry trends and best practices in data engineering and Databricks.
- Mentor and guide junior data engineers, providing technical leadership and support.

WHAT WE'LL OFFER YOU:

- An open transparent work culture with focus on employee delight.
- Opportunity to work on challenging projects.
- A strong process-oriented work environment using modern work tools to drive efficiency inservice delivery.
- A work from home policy focused on optimum work life balance.
- Industry leading pay scale with benefits.
- A collaborative work culture with emphasis on learning and innovation.
- A clear growth path intended to achieve personal aspirations and goals.

JOB TITLE:
Senior Data Engineer- Databricks

KEY COMPETENCIES & SKILLS (Good to have) :

- Experience with machine learning and Gen AI capabilities on Databricks (with knowledge on MLflow)
- Databricks Data Engineering Professional certification is a plus
- Certification in Azure/AWS Engineering area is a plus
- Experience working in an Agile environment (Scrum, Agile) is a plus.
- External contributions like Git, Medium etc. will be a plus.
